

COMPARE MODELS

The Compact

The Compact is designed for use in kitchens where you have multiple sinks, but a limited amount of space underneath them.

The Drain Plate

The Drain Plate is designed for use in kitchens where you have taller drains to tie into such as wall drains or grease traps.

The Crown Adapter

The Crown Adapter is designed to replace commercial garbage disposals and is installed flush underneath the bottom of the sink bowl.

The XL

The XL also has a crown adapter on top and is designed to replace commercial garbage disposals. It has longer legs for taller sinks.

WE'RE HERE TO HELP

The Drain Strainer™ is a small, family owned company founded and operated by a 15-year restaurant owner.

Our staff knows the foodservice business and understands your concerns. We are here to serve our fellow commercial kitchen owners and operators.

Our company founder originally created The Drain Strainer™ to solve drain problems in his own restaurant. We believed so strongly in its success that we started this company to share our concept with other commercial kitchens.

We've been in your shoes and we're here to help.

LIST OF FEATURES

The Drain Strainer™ is a wet waste collector that captures food scraps while still allowing your sinks to drain quickly.

Stainless Steel Construction

The Drain Strainer™ is made of sturdy stainless steel to stand up to the wear and tear of your busy commercial kitchen.

Universal Crown Adapter

The Crown Adapter and XL models have a universal crown adapter on top to cover up the hole when you replace a garbage disposal.

Strainer Drawer

The water from your sinks filters through the holes in our strainer drawer inside the housing while the food debris gets captured.

Adjustable Legs

Our Drain Plate, Crown Adapter and XL models have adjustable legs to customize your Drain Strainer™ to the perfect height.

PROBLEMS IT SOLVES

This effective and affordable commercial garbage disposal alternative solves many common commercial kitchen problems.

No More Garbage Disposals

No gaskets or seals that can leak. No ball bearings to wear out. No motor that eventually burns up. No dangerous sharp blades.

Less Grease Trap Pumping

Cleaning grease traps stinks. The Drain Strainer™ captures the food solids that normally clog your grease trap.

No More Expensive Chemicals

Drain chemicals, bacteria and enzymes can damage your pipes over time. They are expensive and you have to keep reordering them.

No More Blocked Drains

The Drain Strainer™ lets your sinks drain quickly and prevents clogged drains. It also creates an air gap in case there is a backflow.

REPLACE YOUR DISPOSAL

Many municipalities have already banned commercial garbage disposals to keep food solids out of their sewer systems and more are considering it in the future.
